

Custom Fan Array for MidMichigan Medical Center - Midland

Background

Project: MidMichigan Medical Center - Midland
Location: Midland, Michigan
Project Description: (9) Custom Air Handling Units

Solution

This project was for a new expansion to an existing hospital. The design utilized Fan Array for air distribution through the supply units and separate return fan housings for the return air. Indoor air quality was a concern so UV lights were provided in addition to 3 stages of filtration.

Benefit

Newmatic Engineering is combining its many years of engineering and mechanical systems knowledge, expertise and service with TMI to offer reliable, high quality, American-made custom air handlers.
